RESPONSE TO OFFICE ACTION

THE ASSISTANT COMMISSIONER OF PATENTS
Washington, D.C. 20231

Sir:

REMARKS

No amendments have been made. Claims 1-5 remain in the application.
Reconsideration and reexamination is respectfully requested.

In paper 5, claims 1, 4 and 5 were rejected under 35 U.S.C. § 103 as allegedly unpatentable over U.S. Patent Number 5,308,970(Pool). Applicant respectfully traverses.

Claim 1 specifies exposing an array of photosensors to light from an image; shifting a first portion of charges from the array of photosensors to an amplifier; dumping a second portion of the charges; exposing the array of photosensors to light from the image again; dumping the first portion of charges from the array of photosensors; and shifting the second portion of charges from the array of photosensors to the amplifier. Pool does not teach or suggest exposing the array of photosensors to light from the image again; dumping the first portion of charges from the array of photosensors; and shifting the second portion of charges from the array of photosensors to the amplifier.
